

## WHAT OUR CUSTOMERS SAY ABOUT US...

[www.conceptrenewables.co.uk](http://www.conceptrenewables.co.uk)

"We recruited Concept's expertise when we needed to fit underfloor heating into a barn conversion and four bed house. They delivered a bespoke supply and installation package and we found them to be extremely knowledgeable & efficient. We look forward to working with them on future projects and would not hesitate to recommend their services."

**Rob Mumford, Builder & Contractor**

"I have been in the property development business for a number of years and Concept Heating & Renewables is one of the most professional company's I have ever had the pleasure of working with. Not only is their product knowledge second-to-none, but their conduct on-site is faultless. It's obvious they take great pride in their work and I look forward to working with them again."

**Stephen Grayston, Director, Saxon Ridge Properties**

"We wanted to invest in renewable technology and needed some advice. We have used Paul for a number of years and he offered expert guidance. He made recommendations based on our lifestyle and energy needs and since installing solar thermal and an energy efficient boiler, we have reduced our energy fuel bills significantly."

**Mrs Frampton**

If you are an existing property owner, self-builder or a private or public house builder and would like some advice – from choosing the best products to integrate or advice on SAP calculations, or even the Code for Sustainable Homes – then please do not hesitate to get in touch for a free, no-obligation consultation.

Specialists in underfloor heating, heat pumps & solar

## ABOUT CONCEPT

Concept Heating & Renewables Ltd specialise in the professional installation of renewable technologies into domestic and commercial properties.

Covering London and the South East, we offer a supply and fit service for a host of energy efficient products, including: heat pumps, solar thermal, underfloor heating, rainwater harvesting & energy efficient boilers.

Our reputation has been built on twenty year's success as professional heat source installation engineers and we have achieved this through our commitment to continued professional development.

## WHY CHOOSE CONCEPT

We understand the importance of 'getting it right first time', which is why Concept Heating & Renewables provide customers with a total supply and fit service.

Being involved from concept to completion means we get to know every intimate detail of your project. It also means you benefit from having just one point of contact throughout the entire process – something rarely offered.

We offer our customers:-

- Full consultation throughout the project, including: renewables feasibility study, cost & energy guidance, advice on government legislation & grant schemes
- Bespoke system design to industry guidelines, via our Partner companies
- Professional installation guaranteed (NICEIC approved heat pump and solar installers, Nu-Heat approved underfloor heating and official Worcester Bosch boiler installers)
- Full & detailed quotations.

## OUR SERVICES

With industry recognised certifications in heat pumps and solar thermal systems, plus manufacturer 'approved' status in underfloor heating and the installation of energy-efficient boilers, we bring a wealth of experience and expertise to each and every project.

Not only does our experience ensure that each system is installed right first time, but this level of expertise also means we are able to maximise system efficiencies for each and every project – something we take great pride in.

We are fully qualified to fit:-

Heat pumps

Solar thermal

Rainwater harvesting

Underfloor heating

Boilers
